

CSL 18000 CHEESE REFORMING SYSTEM

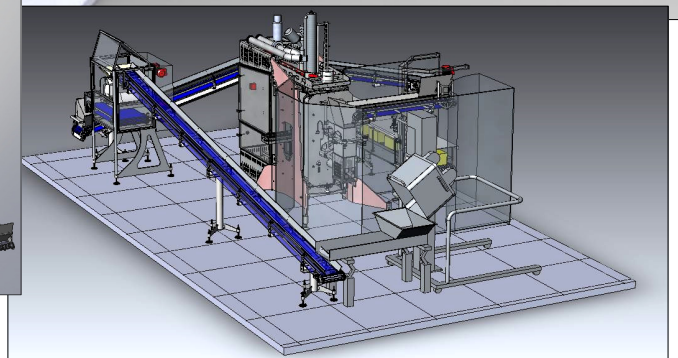

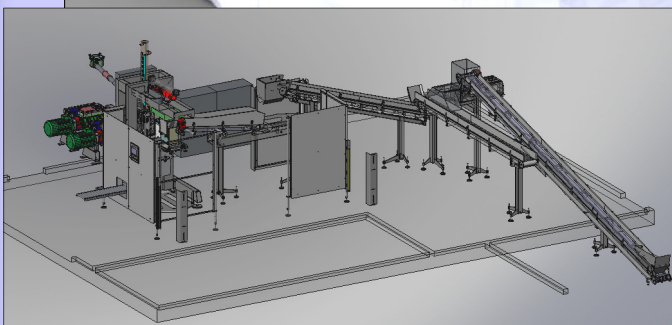

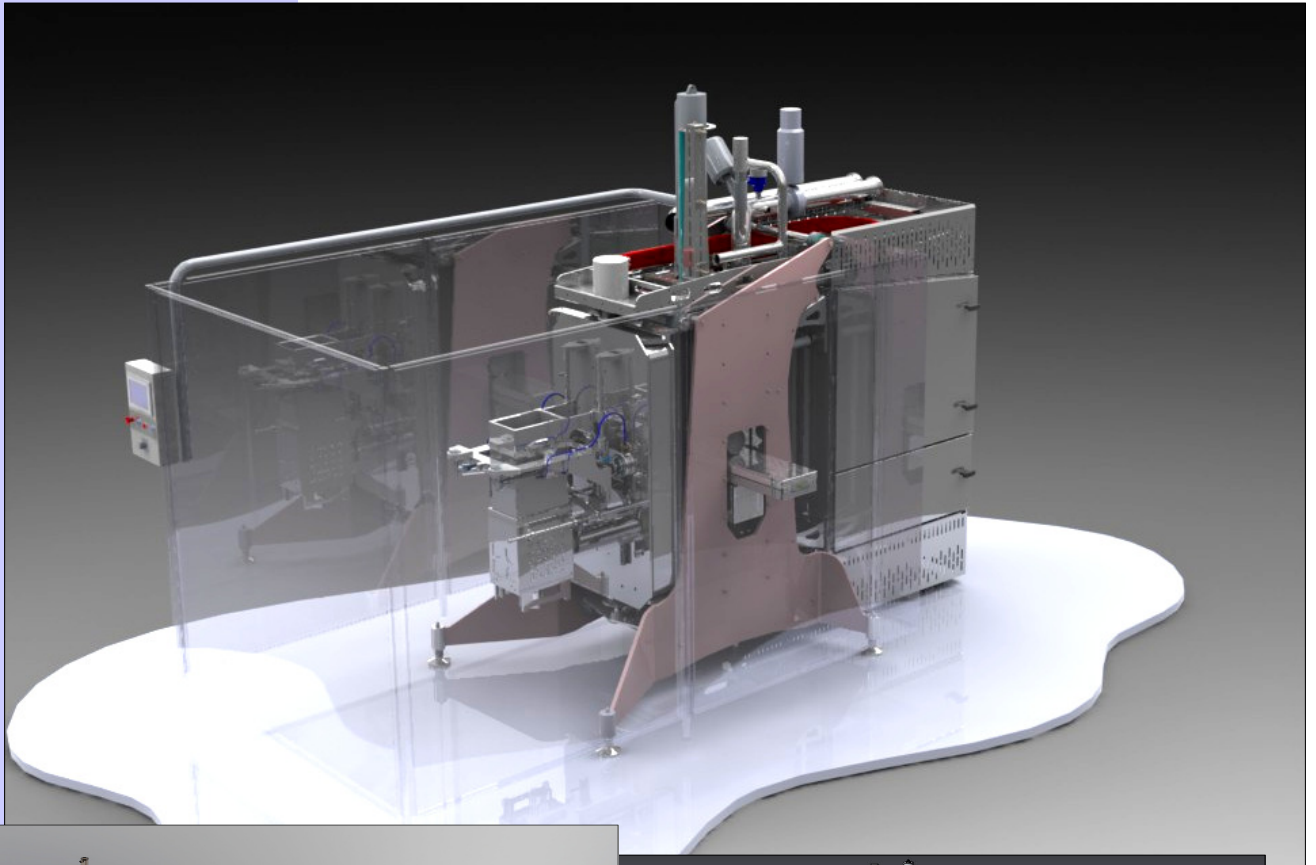

Reforming Cheese into standard cheese blocks greatly reduces storage.

Reformed blocks can be processed with standard equipment.

Fully automated Reforming System for Cheese Off-cuts, Trim and Rejects

- Reforming into standard 20kg or 40lb block formats
- Dual-Door System for increased throughput - up to 45 blocks per hour
- Automated Batch Weighing for accurate weight control
- Compression under controlled vacuum - gas flush capable
- Automated Bag Sealing under vacuum
- Modular Cheese Feeding System to suit plant layout / type of operation
- Intuitive Touch Screen operation with recipe settings
- Easy access for wash-down cleaning
- Safety Guarding to AS/NZS 4024 - CAT3
